

## WNTC

WNTC Radio, located in the Chemistry Annex behind the Clarkson Library, plays creative-contemporary music combining the best of progressive and Top 40 music both new and old. WNTC operates on an assigned frequency of 84.5 FM and cable FM 90 stereo, including a listening indicator of Peabody and surrounding areas. Some of the special programming includes the Rock-the-Planet World Rock Show, a Future Gold Show, 15, Electronic, and Earth Music. To keep the college community informed, community announcements, news, weather, and sport is the aired throughout the day. WNTC and members have been busy this school year remodeling the radio station. The phase of operations began during summer 1975 when Clarkson put a new roof on the Chemistry Annex, creating two spaces for WNTC stereo, resulting in a total remodeling of the building's interior. Another revision this year was a change in stereo broadcasting. WNTC encourages people who is interested in any phase of radio to stop in anytime for information.

ICRN is an organization dedicated to all facets of radio broadcasting. Our two radio stations bring the students of H&P and C&T the best in music, news, and educational programming in AM and three-titled FM stereo, and the opportunity for any interested students to work in radio. ICRN is the only student organization which operates on both campuses school-year-round and is funded by both SCLN and C&CA senators.
